Application is made as a result of significant electric load growth related to oil and gas activity in the area. The current transmission system is not capable of reliably meeting the demand. The entire transmission project will extend about 27 miles total and begin approximately 5 miles northwest of Fairview. Because this project falls under the Department of Energy, Western Area Power Administration's jurisdiction, an Environmental Analysis was completed by that agency. Minimal impacts are expected from the project and the proposed easement alignment across state land is as near as possible to section lines and alongside Highway 201. The Department recommends approval.
